

# The Wayne County Recovery Coalition (WCRC) Needs Your Support!

The WCRC was formed in 2019 when a task force was developed to look into the rising number of ER visits related to drug use and overdose deaths due to opioid overdose in Wayne County. The county has some of the highest rates in Georgia for deaths due to abuse of opioids. The WCRC has been awarded a Drug Free Communities Support Program (DFCSP) grant from the Centers for Disease Control and Prevention to expand its focus to include youth substance abuse prevention. We need your help! The grant requires a 1:1 match with community support (either in-kind of volunteer time, space, etc.) or monetary contributions. Share Health Southeast Georgia is the fiscal agent and provides overall project direction and Anchored houses the WCRC and provides project coordination. All donations made through Share Health will be targeted to DFCSP activities.

The DFCSP has two goals:

- Establish and strengthen collaboration among communities, public, and private non-profit agencies, as well as federal, state, local, and tribal governments to support the efforts of community coalitions working to prevent and reduce substance abuse among youth
- Reduce substance use among youth and, over time, reduce substance use among adults by addressing the factors in a community that increase the risk of substance abuse and promoting the factors that minimize the risk of substance abuse.

If you have given in the past, we would like to say thank you! We truly would not be able to do what we do without the kindness and generosity of our community. We are now asking for your support during this grant year. Will you consider sponsoring one of the areas below to help us prevent youth substance misuse?

## Choose your area of support:

- Drug Prevention Programming
- Community Prevention Events
- Youth Leadership Training
- Volunteer time at an event or coalition activity
- Wherever my support is most needed
